AXS Event Discovery API

URL Syntax

[base url] / version / event / eventid ? [parameters]

Events List API

Example Query List:

```
1 http://api.aks.com/v1/events?access_token=INSERTACCESSTOKEN&siteId=INSERTSITEID
```

Example Single Record Query:

```
1 http://api.aks.com/v1/events/EVENTID?access_token=INSERTACCESSTOKEN&siteId=INSERTSITEID
```

Errors

- [Success \(200\)](#)
- [Error \(400\)](#)

Parameters

Function	Parameter	Value	Required?	Expected Response	Notes
Security	access_token	Alphanumeric e.g. access_token=axe_site	Required		
Filtering	siteId	Numeric e.g. siteId=1	Required	Returns all events assigned to specified Site ID.	siteId=1 is for all AXS events. If no site ID is specified, all active and announced events will be returned in date order (ascending -> descending).
	venueId	Numeric/Numeric Array e.g. venueId=1 OR venueId=[1,2,3]	Optional	Returns all events assigned to specified Venue ID(s).	Array requires the brackets.
	performerId	Numeric e.g. performerId=1	Optional	Returns all events assigned to specified Performer ID.	
	returnData	complete minimum	Optional	Returns short response or complete response.	If none is specified, returnData=complete is default.
	modifiedStartDate	UTC String Date e.g. start=YYYY-MM-DD	Optional	Return all events that have been created or modified within the dates specified (00:01 - > 23:59 of day)	
	modifiedEndDate	UTC String Date e.g. start=YYYY-MM-DD	Conditional	Required if a modified start date is passed.	

	ticketerId	Numeric or Numeric Array e.g. ticketerId=22	Optional	Display events with assigned ticketer ID(s).	Default: all events when not passed ticketerId=22 is AXS Primary (Returns only AXS ticketed events) ticketerId=29 is AXS Marketplace (Returns Secondary Resale events)
	eventCode	Alphanumeric e.g. eventCode=1234-234	Optional	Display event matching a specific event code or event ID.	Note: All event codes are a combination of contextid-eventid. ticketerId=22 is a required param to filter by eventCode. Does not support an array, singular event code only.
	includeUnannounced	Boolean e.g includeUnannounced=true/false	Optional	Include unannounced events in returned payload	Defaults to false Permission needed
	includePrivateEvents	Boolean e.g includePrivateEvents=true/false	Optional	Include private events in returned payload	Defaults to false Permission needed
	ticketingStatusIds	Numeric Array e.g. ticketingStatusIds=[1,2]	Optional	Filters by these ticketing status ids	All available ticketingStatusIds listed below in Appendix 1
Pagination	rows	1 - 100	Optional	Returns # of records based on the numerical value specified.	Min-Max: 10-100 Default: 10
	page	1 - total number of pages	Optional	Returns next set of row results.	The starting index (1-based). Default 1. A page greater than the number of items will return an empty response.

Geo Filtering	lat	Decimal e.g. lat=44.9806548	Optional	Return events based on locality to lat/long.	If no long/lat is specified, all active and announced events in all locations will be returned. Note: A common error that is made is incorrectly lat and long values and not taking negative values into account. Please include a negative symbol (-) for locations for Southern latitudes and Western longitudes.
	long	Decimal e.g. long=-93.2740388	Optional		
	radius	Numeric e.g. radius=25	Optional	Expand event results based on specified radius in miles.	Geo-radius to determine search expansion based on lat/long in miles. Default: 400 miles
	minMatch	Numeric e.g. minMatch=12	Optional	Minimum amount of total records to be returned.	Minimum results returned. Expand search as needed to fulfill minimum records.
	cc	Alphanumeric/Alphanumeric Array e.g. cc=us OR cc=[gb,us]	Optional	Return events that occur in the specified country code(s).	Alpha-2 country code ISO standard. See http://en.wikipedia.org/wiki/ISO_3166-1
Time Frame	start	UTC String Date/Time e.g. start=YYYY-MM-DDT00:00:00	Optional	Return event results that occur from the specified start date and time until the end record.	Query events with event date/announce date occurring within specified dates. If no end date/time is specified, return until last record. If no start date/time is specified, assume start date/time is present date. Note: Date only will result in an error. Important: Please take UTC offset(s) into account when authoring your query.
	end	UTC String Date/Time e.g. end=YYYY-MM-DDT00:00:00	Optional	Return event results that occur from the present until the specified end date and time.	

	onsaleStart	UTC String Date/Time e.g. onsaleStart=YYYY-MM-DDT00:00:00	Optional	Return event results that have an onsale date that fall within the specified start date and time until the end record.	
	onsaleEnd	UTC String Date/Time e.g. onsaleEnd=YYYY-MM-DDT00:00:00	Optional	Return event results that have an onsale date that fall within the present date until the specified end date.	
Calendar	monthPlus	Numerical e.g. monthPlus=0	Optional	0 returns events for the current month (excluding any past events which are no longer visible).	Values > 0 return incremental months into the future. e.g. If 0 is November 2012, 1 is December, and 11 is October 2013
Genre	majorCat	Numerical Array e.g. majorCat=1,2,3	Optional	Return event results assigned to specified majorCat.	All available Genre majorCat Ids listed below in Appendix 2
	minorCat	Numerical Array e.g. minorCat=1,2,3	Optional	Return event results assigned to specified minorCat.	All available Genre minorCat Ids listed below in Appendix 2
Includes	includes	Valid field e.g. includes=primary,primary_sub	Optional	Return only specified fields in response.	Comma separated list of data strings corresponding to fields of the response. Only specified fields will be returned as a result. Nested parameters are addressed by dot notation e.g. venue.venueId. An unrecognized value and spaces are ignored.

Language	locale	Valid language code e.g. locale=en-GB	Optional	Return data in language specified.	If no locale is passed, default is en-US. Languages supported: en-GB, en-US, sv-SE (note: not case sensitive)
Sorting	sort	One of the following values: 'distance' 'upcoming' 'announced' e.g. sort=distance	Optional	Sorts results based on criteria specified	If no value is passed, default is 'upcoming', which sorts by event date time In the event two events meet the same criteria, (same date/time) the eventId is the tiebreaker Note: distance param requires 'lat' and 'long' to also be specified

Media

AXS.com has media hierarchy logic in place to ensure that no default media is displayed for an event. The hierarchy logic is as follows:

Event Media -> Tour Media -> Performer Media -> Venue Media -> Default

(if no media is found on the event level, it will inherit the tour media if the event is associated to a tour; if none, inherit performer; if none, venue media; if none, default)

If you would like media uploaded explicitly for the event ***only***, utilize the media under "media" response. *If you would like to use media based on the inheritance logic listed above, utilize **relatedMedia** (recommended).*

Primary Image Sizes

The primary image sizes for each event are (678x399) or (564x564). All other image sizes are not consistently used by venues.

An example from the API is provided below:

```
1  {
2    "events": [
3      {
4        "media": {
5          "17": {
6            "media_id": "5217983",
7            "width": 678,
8            "height": 399,
9            "file_name": "https://images.discovery-prod.axs.com/2025/08/uploadedImage_68a8a1bc5952c.jpg"
10         },
11        "18": {
12          "media_id": "5217987",
13          "width": 564,
14          "height": 564,
15          "file_name": "https://images.discovery-prod.axs.com/2025/08/uploadedImage_68a8a1bde6507.jpg"
16        },
17      }
18    ]
19  }
```

Response Schema

i The `dateOnly` field indicates whether the returned event has a specified start time or not. If the `dateOnly` field is "True", the `eventDateTime` field will be formatted like `{eventDate}T00:00:00`. This is typically done for events that intentionally do not have a time. **If `dateOnly` is "True", you may want to add handling to exclude the time component; otherwise, the event's time may appear as midnight.**

Schema Code Block

```
1  {
2    "eventId": {"type": "integer"},
3    "locale": {
4      "type": "string",
5      "oneof": ["en-GB", "en-US", "sv-SE"],
6      "description": "Event data language; should reflect locale you are passing if one was passed."
7    },
8    "localeAvailable": {
9      "type": "string"
10     "oneof": ["en-GB", "en-US", "sv-SE"],
11     "description": "Actual data available for the event; if locale passed and response
12                   is not available as a localeAvailable, translatable data is suppressed."
13   },
14   "title": {
15     "type": "object",
16     "properties": {
17       "presentedBy": {"type": "string"},
18       "headliners": {"type": "string"},
19       "supporting": {"type": "string"},
20       "tour": {"type": "string"},
21       "eventTitle": {"type": "string"},
22       "eventTitleText": {"type": "string"}
23     }
24   },
25   "age": {
26     "type": "string",
27     "oneof": ["null", "All Ages", "All Ages to Enter, 21 & Over to Drink", "21 & Over",
28             "19 & Over", "18 & Over", "16 & Over", "Over 19s Only", "Over 18s Only", "Over 16s only",
29             "Over 14s Only", "14 & Over", "(All Ages) Mature Content"]
30   },
31   "currency": {
32     "type": "string",
33     "oneof": ["USD", "GBP", "EUR", "Other"]
34   },
35   "eventDateTime": {
36     "type": "string",
37     "description": "Venue localized date and time. TBD if date and time is set to TBD. If the
38                   dateOnly field included in this response is "True" (indicating that there is no specified
39                   time for the event), then this will be formatted like `{eventDate}T00:00:00`. If this case
40                   is not handled appropriately to exclude the time component, then the event's time may
41                   appear as midnight."
42   },
